

Machine Installation Engineer

Department: Service

Location: Chennai & Bengaluru (Hebbal Office)

Job Summary

The Machine Installation Engineer is responsible for the installation and commissioning of CNC sheet metal processing machines. This includes Punching, Bending, and Laser cutting machines across customer sites.

Key Responsibilities

- Install and test CNC machines as per customer and company standards.
- Prepare installation documentation and service records.
- Ensure safe and precise alignment and calibration of machinery.
- Collaborate with clients and internal teams for successful installations.
- Recommend service improvements and track machine performance.

Required Qualifications

- Diploma in Mechatronics or Mechanical or Electrical Engineering.
- Minimum 1-2 years of experience in CNC machine maintenance or installation.

Preferred Skills & Experience

- Hands-on experience with Punching, Bending, and Laser machines.
- Knowledge of mechanical and electrical systems.
- Valid driver's license and ability to travel extensively.

Soft Skills

- Strong troubleshooting and analytical skills.
- Clear communicator with good client handling skills.
- Organized and detail-oriented.

Travel/Other Requirements

Must travel extensively and lift heavy equipment. Notice period should not exceed 30 days.
